

FLÁVIO LUCAS

COMPUTER ENGINEER FULL STACK DEVELOPER

As a Computer Engineering student with over 3 years of experience in web development, I possess skills in both front-end and back-end development, and my portfolio showcases some successful projects. I excel at team collaboration, utilizing agile methodologies and gitflow for code versioning, and I stay up-to-date on the latest industry standards. I'm searching for new experiences in computer engineering and trying to learn more and more day by day.

As an intern, I am eager to contribute my skills to challenging projects and learn from a highly qualified team. I am passionate about web development and always strive to stay on top of emerging trends and technologies. Working alongside a highly qualified team would provide me with valuable learning opportunities and experience that I can carry with me throughout my career. I am confident that I can bring value to the team and look forward to discussing how I can contribute to the success of the company.
